

Assignment #1 Follow-up

Brian's Logic

- Formative vs Summative Assessment
- The right kind of feedback
- Grading philosophy

Formative vs Summative Assessment

Formative: Given throughout the learning process, seek to determine how students are progressing through a certain learning goal.

Summative: Assess a student's mastery of a topic after instruction.

Right Kind of Feedback

- Strict feedback better than no feedback; You will get no feedback during the actual job search
- Early (in term, in year, in career)
- Non-fatal

Why I don't give automatic individual written feedback

- Box of time & Greatest good
- Individual vs Group
- Automatic vs Seeking
- Written vs In-person

Grading Philosophy

- High Standards
- I want to work with you to rise to the standards
- More rubrics!
- Any changes will only benefit you (e.g., curving up or another pass at an assignment)

Top Student Example

My name is -----, I moved from ----- to San Francisco this year to pursue a career in data science. I'm currently enrolled at the MSDS program at USF and expect to graduate by July 2019. On my free time, I like to play volleyball and throw ceramic pieces on the potter's wheel. I started these hobbies many years ago and I'm always looking for time to practice my skills. I also really enjoy data science because I feel I can apply my curious nature, my love for investigation, and my skills in mathematics all into a project that can have a meaningful impact on the community around me.

Top Student Example Revised

My name is -----, I moved from ----- to San Francisco this year to pursue a career in data science. I'm currently enrolled at the **Masters of Data Science** program at **University of San Francisco** and **will** graduate in July of 2019. I really enjoy data science because ~~I feel~~ I can apply my curious nature, my love for investigation, and my skills in mathematics all together. In particular, I want to have impact on my local community by working for a mission driven organization.~~into a project that can have a meaningful impact on the community around me.~~ **In** my **limited** free time, I like to play volleyball and throw ceramic pieces on the potter's wheel. ~~I started these hobbies many years ago and I'm always looking for time to practice my skills.~~
